

Working within the prison environment provides a challenging backdrop to some of the most rewarding work you will do within your career. Our aim is to provide the best quality care we can which means ensuring respect and wellbeing is central to our approach in supporting people to change their lives for the better.

We strive to provide high quality healthcare to those in the custodial setting. We work closely with partners in an aim to deliver the same level of healthcare to prisoners as one would expect to receive in the community.

We are an integrated Mental Health and Substance Misuse Team providing a holistic level of care. The team consists of registered mental health nurses, substance misuse workers, psychiatrists, psychologist, social worker, occupational therapist and an administrator working within the prison environment alongside a wide range of professionals providing a multi-agency approach.

Working in prison is never dull or predictable. It comes with its own challenges however; it is a rewarding diverse environment like no other, where you can gain a wide range of new skills and experiences.
